

Spring Step Anti-Fatigue Mat

Increase productivity and reduce discomfort

Perfect for service counters and areas where employees stand for prolonged periods, these all-rubber mats are among our most popular. The domed rubber bubbles provide a balance of support and cushion, helping reduce discomfort. These mats are lightweight, but rubber construction helps ensure they'll stay in place no matter the type of facility floor.

Features & Benefits

Increase productivity and reduce worker fatigue with a Flex Step Anti-Fatigue Mat.

- Air domes provide comfort for legs, feet and back
- Beveled edges increase safety by helping to prevent trips and falls
- All-rubber construction for maximum durability
- Seal of Acceptance from the American Podiatric Medical Association
- Reduces fatigue and discomfort while increasing productivity
- Made from approximately 50% recycled rubber
